

# RENAULT SPORT CLIO 197, MEGANE dCi 175, MEGANE 225

PASSION, PERFORMANCE, PANACHE  
IT TAKES A PERFORMANCE CAR  
ENTHUSIAST TO APPRECIATE THE  
BEAUTY OF RENAULT SPORT.  
SHARING THAT SAME PASSION  
FOR PERFORMANCE, THE  
RENAULT SPORT TEAM EXCELS  
AT TAKING ALREADY GREAT  
CARS AND TURNING THEM INTO  
THE ULTIMATE DRIVING EXPERIENCE.

The very fact that you're reading this brochure means you see a car as more than just a way of getting from A to B. It has to have style, it has to have performance and it has to have street cred. The team at Renault Sport give you all that in bucket loads.

As the specialist unit that creates Renault's range of high-performance cars, Renault Sport has taken two of the most exciting hot hatches on the market and introduced some of the performance-enhancing DNA that Renault developed during the last century of motor sport. From the classic city-to-city races at the dawn of the automobile, through Le Mans and the Monte Carlo Rally to today's Formula 1, Renault has always been a winner.

Unsurprisingly, this impeccable racing heritage has resulted in the creation of an incomparable Renault Sport range for the 21st Century. Today's inspiring series of high-performance vehicles includes the sublime Mégane Renault Sport 225 and Renault F1 Team R26.

Stretching performance boundaries ever further, Renault Sport has now introduced the Clio 197 and the Mégane dCi 175. The result is a choice of high performance vehicles that take an uncompromising approach to performance and comfort, for the ultimate Renault driving experience.

## **CLIO RENAULT SPORT 197**

SOME HATCHES LOOK GOOD, SOME ARE FAST – THIS IS BOTH

The Clio Renault Sport 197 has redefined what constitutes a hot hatch with sensational performance from its powerful 2.0L engine, advanced chassis dynamics and a F1-developed air diffuser keeping it firmly glued to the road.

From supportive sports seats to sport-biased ESP which you can disconnect if you're on the track, Renault Sport has created the ultimate driving environment.

The engine has been extensively revised from the previous Clio Renault Sport 182 with new inlet tracts, valve seat aerodynamics, camshaft, crank shaft and pistons. Continuously variable valve timing results in 145kw of power at 7250rpm and 215Nm of torque at 5550rpm. And with the close ratio 6 speed gearbox, changing gears has never been so sweet or rewarding.

# MEGANE RENAULT SPORT dCi 175

## TALK THE TORQUE

There's no question, owning a Renault Sport vehicle assures you of an unbeatable driving experience. However for some, that's not enough. As well as awesome motoring power, they want excellent fuel economy and reduced emissions.

Enter the Mégane Renault Sport dCi 175. The first ever diesel model in the Renault Sport range, it boasts environmentally sound emissions of 165g/km\*, from an engine that delivers a super-efficient combined fuel consumption of 6.3L/100km\*. And all this is supported by the most powerful 2.0L diesel engine on the Australian market! (Source: ROADTODATA 07/2008)

In addition, owning a high-performance car doesn't mean that comfort is taken out of the equation. The Mégane dCi 175 has leather seats, xenon lamps, cruise control and 6-CD changer AM/FM radio as standard.

Mégane dCi 175 – Increased emotions = reduced emissions.

\*Vehicle tested in accordance with ADR 81/02 (litres/100km combined cycle).

# MEGANE RENAULT SPORT 225 5-DOOR

IF YOU'RE SERIOUS ABOUT HAVING FUN

With a 2.0L turbocharged power unit putting out a whopping 165kw, you might think the Mégane Renault Sport 225, would be a stripped-out competition special with very little in the way of creature comforts. But you'd be wrong.

This is a car for the driver who wants mind-blowing performance, but not at the expense of their comfort. The contoured seats gently cradle your body during fast cornering, while providing support and comfort for long distance motorway cruising.

The aggressive, yet sleek bodywork houses a finely tuned chassis, engineered to give crisp feedback to the driver. The Brembo brakes inspire confidence every time you need to wash off speed quickly.

For extra street cred the interior is trimmed in carbon leather. Nobody said that a performance car interior couldn't be radically stylish.

The Mégane 225 – Enjoy your drive.

## **RENAULT, THE ONLY CAR MANUFACTURER TO HAVE 11 VEHICLES AWARDED 5 STARS IN THE EURO NCAP CRASH TESTS**

Renault's passion for performance, style and safety is what drives us to create unique automotive concepts, ranging from practical and versatile people movers to high performance coupés and hot hatches. But there is one thing that they all share in common, and that is the race-bred technology that makes every Renault a pleasure to drive and own.

Our Formula 1 programme provides a perfect test bed for technological innovation and development, with many of the new materials and technologies developed to produce a winning race car finding their way into our road-going vehicles. Constant improvements in performance, handling and safety can be directly attributed to Renault's passion for racing and the transfer of skills between the Renault Technocentre and our Formula 1 team. Our goal is to create the ultimate Renault driving experience. Drive a Renault today and you'll understand what we're talking about.

## ECOLOGICAL ECONOMICAL

Renault's environmental policy is based on an understanding of the ecological challenges that our planet faces. This policy aims to make Renault one of the world's top three car makers for low level emissions of CO2.

Renault underlines its commitment to protecting the environment and so offers a range of vehicles that are both economical and ecologically sound.

- Ecologically sound through a commitment to reducing the environmental impact for the entire lifespan of the car. From the outset, each new project incorporates production processes, choice of materials, pollutant and CO2 emissions, fuel consumption and recycling.

- Economical in terms of fuel consumption. Renault emphasises that the solution to many great ecological challenges lie in technological advancements that can be applied to the majority of vehicles whilst maintaining attractive pricing.

- Recycling – Renault strives to manufacture vehicles that are environmentally safer than ever before. One of Renault's strengths is its capacity to integrate the environment into every stage of a vehicle project right from the design phase until the end of its life cycle. Eco-design of current Renault vehicles enables 95% of their weight to have a second life. It also means that an increasing number of components are made of recycled plastics and renewable materials.

## FORMULA 1, A SCHOOL OF EXCELLENCE

Formula 1 is an extremely demanding sport. It teaches us that what really counts, besides performance, is the ability to construct reliable cars which won't let you down, despite being subjected to extreme physical conditions.

We have applied this philosophy not only to our racing cars. Because our commitment to Formula 1 has only one aim: to teach us how we can offer you reliable, safe, high-performance cars, upon which you can always rely.

## SERVICE AND MAINTENANCE. HELPING YOU STAY PRODUCTIVE AND COMPETITIVE...

All new Renault Sport vehicles are covered by a 3 Year/100,000 Kilometre Warranty and Renault 24 Hour Roadside Assistance Program.

With over 100 years experience as a motor vehicle manufacturer and as Europe's largest automotive brand the Renault service and maintenance network offers peace of mind for all new Renault owners.

Each of the approved and authorised Renault Dealerships across Australia have completed rigorous training programs in parts, service and maintenance.

They can maintain your new Renault at peak efficiency – in workshops equipped with the very latest technology and specialist tools. All Renault Dealerships can also supply you with parts, accessories, the latest Renault promotional merchandise and friendly, helpful advice.
